

As a more than 245-year-old family business with over 2,500 employees worldwide, the BUTTING Group is one of Europe's leading stainless steel processors. Our customers benefit from the strengths of the individual companies, which are combined to the advantage of our partners. Our engineering office in Oberursel, near Frankfurt am Main (Germany), offers our customers a broad portfolio of engineering services.

BUTTING Plant Engineering GmbH in Oberursel is as soon as possible looking for a

Piping Engineer

Reference number: 03-2025

Responsibility / tasks:

- 3D pipeline planning and layout optimization taking into account local conditions and process requirements
- Cooperation with the pipeline calculation department (creation of routing specifications, interpretation of stress calculations and implementation in the 3D model)
- Supporting the quotation department with quantity estimates
- Incorporation of piping details in piping and instrumentation diagrams (P&IDs)
- Creation and optimization of bracket designs
- Maintenance and adaptation of the software piping catalog, taking into account local and international standards
- Support in the selection of materials and suitable piping components (e.g. fittings)
- Preparation of measurements and hand isometric drawings on site as a basis for planning
- Preparation of typical piping documents, including: Piping isometrics, Material extracts, Special part drawings, Mounting drawings and other required documents
- Preparation of typical plant engineering documents, including: Installation plans, 2D layout drawings, Site plans and further planning documents
- Support for material procurement, through: Technical inspections at suppliers, Coordination meetings with suppliers and customers, Support with supplier selection and qualification
- Participation in design reviews
- Coordination and data exchange with other trades and external companies
- Creation of visualization models

Qualification / Profile:

- Completed studies in mechanical engineering or comparable training (e.g. technical mechanics, process engineering, civil engineering or equivalent international qualifications)
- At least 5 years of relevant professional experience
- Experience with AutoCAD Plant 3D is an advantage
- Willingness to make occasional plant visits, e.g. for measurements
- Sound knowledge of piping components and materials
- Interest in plant and pipeline construction
- Experience with pipeline calculations
- Very good written and spoken English skills
- German language skills at least at B2 level
- Independent, structured way of working and strong communication skills

You can look forward to a job in a family-run and economically stable company in the 7th generation with prospects for the future. We offer an open, friendly and collegial working atmosphere with flat hierarchies and short decision-making processes. You will receive a fair salary with holiday and Christmas bonuses as well as other company benefits. You can look forward to working in a committed team.

Please send us your detailed application by e-mail, stating your salary expectations and your earliest possible starting date:
